Cindy,

The earlier air monitoring results provided are sufficient for my needs. I do not need a formal report created.

Hi Cindy.

I spoke with Rose and we think the raw results/printouts will suffice, along with an indication of the date(s) time and locations within the building where the samples were taken.

Thanks,

Tony

Skip and Tony,

I will need to have Hoang submit a report for the air results. How do you want the results? This testing was not done as a formal sample so right now it is not in our system to generate a regular lab report. I can have this done and create the "formal" report or we can provide the instrument printouts, which is a less formal presentation. Please let me know your preference.

Thanks,
Cindy

Subject: Freedom Industries Samples - Union Request for Information

Good Morning Skip:

I have reviewed all of the e-mails and materials provided to Rose Anshant in relation to Freedom Industries Sample "Odor" case. (cumulative record attached as a pdf)

Our response to the Union Requests For Information (RFI) is becoming time-critical.

The following information and documentation is still required to complete the Agency response to the Union's request:

1) Copies of the MSDS's for 1) Crude MCHM and 2) Crude PPH

2) what are the safe levels of concentration for each contaminate identified, specific to the samples? (water, air, product, etc.)

3) All documentation relating to the two air samples ("grab" and 24-hour samples) taken by Hoang Nguyen, including the location(s) within the facility at which the two air samples conducted by Hoang Nguyen were taken.

4) did any bargaining unit members complain about health symptoms; if, yes, was any medical monitoring offered/provided.

Please call me as soon as possible to discuss/review this matter. Thanks.

Tony
